Provided that—

(a) nothing herein contained shall be deemed to require any Magistrate or Judge of a Criminal Court to examine or impound, if he does not think fit so to do, any instrument coming before him in the course of any proceeding other than a proceeding under Chapter XII or Chapter XXXVI of the ¹Code of Criminal Procedure, 1898;

(b) in the case of a Judge of a High Court, the duty of examining and impounding any instrument under this section may be delegated to such officer as the Court appoints in this behalf.

Admission of instrument where not to be questioned.

36. Where an instrument has been admitted in evidence, such admission shall not, except as provided in section 61, be called in question at any stage of the same suit or proceeding on the ground that the instrument has not been duly stamped.

37. The Governor General in Council may make rules providing that, where an instrument bears a stamp of sufficient amount but of improper description, it may, on payment of the duty with which the same is chargeable, be certified to be duly stamped, and any instrument so certified shall then be deemed to have been duly stamped as from the date of its execution.

(2) In every other case, the person so impounding an instrument shall send it in original to the Collector.

39. (1) When a copy of an instrument is sent to the Collector under section 38, sub-section (1), he may, if he thinks fit, upon application made to him in this behalf or, if no application is made, with the consent of the ¹ Chief Controlling Revenue-authority, refund any portion of the penalty in excess of five rupees which has been paid in respect of such instrument.

(2) When such instrument has been impounded only because it has been written in contravention of section 13 or section 14, the Collector may refund the whole penalty so paid.

41. If any instrument chargeable with duty and not duly stamped, not being an instrument chargeable with a duty of one anna only or a bill of exchange or promissory note, is produced by any person of his own motion before the Collector within one year from the date of its execution or first execution, and such person brings to the notice of the Collector the fact that such instrument is not duly stamped and offers to pay to the Collector the amount of the proper duty, or the amount required to make up the same, and the Collector is satisfied that the omission to duly stamp such instrument has been occasioned by accident, mistake or urgent necessity, he may, instead of proceeding under sections 33 and 40, receive such amount and proceed as next hereinafter prescribed.

Provided that no such prosecution shall be instituted in the case of any instrument in respect of which such a penalty has been paid, unless it appears to the Collector that the offence was committed with an intention of evading payment of the proper duty.

(4) for want of the execution thereof by some material party, and his inability or refusal to sign the same, is in fact incomplete and insufficient for the purpose for which it was intended :

(5) by reason of the refusal of any person to act under the same, or to advance any money intended to be thereby secured, or by the refusal or non-acceptance of any office thereby granted, totally fails of the intended purpose :

(c) A, being in debt to B, the money-lender of his village, contracts a fresh loan on terms which appear to be unconscionable. It lies on B to prove that the contract was not induced by undue influence.

(d) A applies to a banker for a loan at a time when there is stringency in the money market. The banker declines to make the loan except at an unusually high rate of interest. Explanation.— A stipulation for increased interest from the date of default may be a stipulation by way of penalty."

(2) After *illustration (c)* to the said section the following *illustrations* shall be added, namely.—

"(d) A gives B a bond for the repayment of Rs. 1,000 with interest at 12 per cent at the end of six months, with a stipulation that, in case of default, interest shall be payable at the rate of 75 per cent from the date of default. This is a stipulation by way of penalty, and B is only entitled to recover from A such compensation as the Court considers reasonable.

(e) A, who owes money to B, a money-lender, undertakes to repay him by delivering to him 10 maunds of grain on a certain date, and stipulates that, in the event of his not delivering the stipulated amount by the stipulated date, he shall be liable to deliver 20 maunds. This is a stipulation by way of penalty, and B is only entitled to reasonable compensation in case of breach.

(f) A undertakes to repay B a loan of Rs. 1,000 by five equal monthly instalments, with a stipulation that, in default of payment of any instalment, the whole shall become due. This stipulation is not by way of penalty, and the contract may be enforced according to its terms.

(g) A borrows Rs. 100 from B and gives him a bond for Rs. 200 payable by five yearly instalments of Rs. 40, with a stipulation that, in default of payment of any instalment, the whole shall become due. This is a stipulation by way of penalty."

THE FIRST SCHEDULE

TESTING

(See section 3)

I — Nature of the Test-apparatus

The apparatus consists of the following parts —

- (1) the oil cup,
- (2) the cover, with slide, test-lamp, and clockwork arrangement for opening and closing the holes in the cover and for dipping the test-flame,
- (3) the water-bath or heating vessel,
- (4) the tripod stand with jacket and spirit-lamp for heating the water bath,
- (5) the thermometer for indicating the temperature of the oil in the oil-cup,
- (6) the thermometer for indicating the temperature of the water in the water bath,
- (7) the thermometer for indicating the temperature of the oil before it is poured into the oil-cup,
- (8) the dropping bottle or *pipette* for replenishing the test-lamp, and
- (9) a barometer stand indised at the Meteorological office of the Province or at any other place appointed by the Local Government

The oil-cup is a cylindrical flat-bottomed vessel made of gun-metal or brass, and tinned or silvered inside. A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination.

The cup is provided with a close-fitting overlapping cover, which carries the thermometers, the test-lamp and the adjuncts thereto. The test-lamp is suspended upon two supports by means of tinnions, which allow it to be easily inclined to a particular angle and restored to its original position. The socket in the cover, which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid.

The cover is provided with three holes, one in the centre and two smaller ones close to the sides. These are closed and opened by means of a pivoted slide. When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid. As the slide moves back so as to cover the holes, the lamp returns to its original position. Upon the

(The First Schedule — Testing)

cover, in front of and in a line with the nozzle of the lamp, is fixed a white bead, the diameter of which represents the size of the test flame to be used

The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air space or air-chamber intervenes between the two; consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air space. The water-bath is fitted with a socket for receiving a long bulb thermometer, to indicate the temperature of the water. It is also provided with a funnel, an overflow-pipe and two handles.

The water-bath rests upon a tripod stand, which is fitted with a copper cylinder or jacket, so that the bath is surrounded by an enclosed air space, which retains and regulates the heat. One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small wing bracket.

The clockwork arrangement, by which during the operation of testing the slide is withdrawn and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test, and with a trigger for starting it each time that the test flame is applied.

II—Directions for drawing the sample and preparing it for testing

1 Drawing the sample—In all cases the testing officer or some person duly authorized by him shall personally superintend the drawing of the sample from an original unopened tin or other vessel.

An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin or other vessel shall be made.

Two bottles, each of the capacity of about forty fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked the cork being well driven home, cut off level with the neck, and melted sealing wax worked into it. The other bottle may be either stoppered or corked.

2. Preparing the sample for testing—About ten fluid ounces of the oil, sufficient for three tests are transferred from the bottle into which the sample has been drawn to a punt flask or bottle, which is to be immersed in water artificially cooled until a thermometer, introduced into the oil, indicates a temperature not exceeding 50° Fahrenheit.

III—Directions for preparing and using the Test apparatus.

1 Preparing the water-bath—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 130° Fahrenheit, and this is attained in the first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer which is provided for testing the temperature of the water gives the proper indication, or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

2. Preparing the test-lamp—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup, should a particular test occupy so long a time that the flame begins to get smaller, through the supply of oil in the lamp

(The First Schedule.—Testing.)

becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the dropping bottle or *pipette* provided for that purpose. This can be safely done without interrupting the test.

3 Filling the oil cup—The oil-cup having been previously cooled, by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit, is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket, the test-lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

4 Application of the test—The water bath, with its thermometer in position, is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test lamp is lighted, and the clockwork wound up by turning the key. The thermometer in the oil cup is now watched, and when the temperature has reached 56° Fahrenheit, the clockwork is set in motion by pressing the trigger.

If no flash takes place, the clockwork is at once rewound and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

If the flash takes place at any temperature below 77° Fahrenheit, the temperature at which it occurs is to be recorded. Two fresh portions of the sample are then to be successively tested in a similar manner and the results recorded. If no greater difference than 2° Fahrenheit exists between any two of the three recorded results, and if in no instance the flash has taken place within eight degrees of the temperature at which the testing is commenced, each result is to be corrected for atmospheric pressure as hereafter described, and the average of the three corrected results is the flashing point of the sample. In the event of there being a greater difference than 2° Fahrenheit between any two of the results, while in no instance has the flash taken place within eight degrees of the temperature at which the testing was commenced, the series of tests is to be rejected, and a fresh series of three similarly obtained, and so on, until a sufficiently concordant series is furnished, when the results are to be corrected and the average taken in the manner already described.

If, however, a flash has occurred at or below 64° when the test is applied in the manner above described, the next testing shall be commenced ten degrees lower than the temperature at which the flash had been previously obtained (that is to say, at 54° or thereunder), and this procedure shall be continued until the results of three consecutive tests do not show a greater difference than 2° and until a flash has not occurred in any of the three tests within eight degrees of the temperature at which the testing is commenced. Provided always that, if at the commencement of the series of tests a flash has occurred on the first application of the test-flame at 56°, and if a flash has also occurred on the first application of the flame in each of three successive tests in which, thereupon, the test-flame is first applied at 46° as above directed, the testing officer shall certify that the petroleum has a flashing point below 47°, and the sample shall be reported dangerous.

If a temperature of 76° Fahrenheit has been reached without a flash occurring, the application of the test flame is to be continued at every degree rise of temperature until a temperature of 95° Fahrenheit has been reached. If no flash has occurred up to this point, and if the petroleum is declared to be imported subject to the provisions of the Act, the tests shall not be continued, and the testing officer shall certify that the petroleum has a flashing point over 95° and is not dangerous. But, if the petroleum is oil ordinarily used for lubricating purposes and is declared to have its

(The First Schedule — Testing.)

flashing point at or above 200° or is oil to which a notification of the Local Government exempting it from the operation of the Act will be applicable in the event of the flashing point being found to be at or above 120° , the test shall be continued as follows — The oil-cup is to be removed from the water bath, and the temperature of the water in the water bath is to be reduced to 95° Fahrenheit by pouring cold water into the funnel (the hot water escaping by the overflow-pipe). The air chamber is then to be filled to a depth of $1\frac{1}{2}$ inches with water at a temperature of about 95° Fahrenheit, the oil-cup is to be replaced in the water-bath and the spirit lamp attached to the water-bath is to be lighted and placed underneath. The test-flame is then to be again applied from 96° Fahrenheit, at every degree rise of temperature as indicated by the thermometer in the oil cup until a flash takes place or until a temperature of 200° Fahrenheit or 120° Fahrenheit, as the case may be, has been reached. If during this operation the test-flame appears to diminish in size, the lamp is to be replenished in the manner prescribed at 2 without interrupting the test.

If a flash occurs at any temperature between 76° and 200° Fahrenheit, the temperature at which it occurs, subject to correction for atmospheric pressure, is the flashing point of the sample.

In repeating a test a fresh sample of oil must always be used, the tested sample being thrown away, and the cup must be wiped dry from any adhering oil and cooled, as already described before receiving the fresh sample.

5 Correction for atmospheric pressure.—As the flashing point of an oil is influenced by changes in atmospheric pressure to an average extent of $1^{\circ}6$ Fahrenheit for every inch of the barometer, a correction of the observed flashing point may become necessary. The height of the barometer must therefore be determined at the time of making the test for the flashing point. The true height of the barometer for the purpose of the test shall be considered to be the height of the column of mercury measured at 32° Fahrenheit, which is supported by the air pressure at the time of the experiment, that is, the actual height of the barometer at the time of observation duly corrected for any error of the instrument and for its temperature if necessary. For the purpose of applying the correction to the flashing point of the oil obtained by the test, a table is appended to this schedule giving the flashing points of oils ranging from 65° to 80° Fahrenheit, under pressure ranging from 27 to 31 inches of mercury.

The table is used in the following manner —

Example — An oil has given a flashing point of 71° , the barometer being at 28 6 inches, take the nearest number to 71° in the vertical column headed 28 6. This number is 70 8. Substitute for this the number in the same horizontal line in the column headed 30 (the normal height of the barometer). The substituted number, that is, the true flashing point of the oil, is 73° .

¹ [6 Application of the test to viscous fluids or preparations, such as solutions of india-rubber in mineral naphtha, or thick paint made with that material]

About a teaspoonful of the substance to be tested is placed in the cup, and the cover fitted with a thermometer is put on.

The cup thus prepared for the test is then cooled down until the thermometer indicates a temperature of 50° Fahrenheit. This may be accomplished either by placing the prepared cup in a refrigerator or by immersing it up to its projecting collar in water which is maintained at a sufficiently low temperature until the result specified has been obtained.

The prepared cup thus cooled is then transferred to the water bath, the temperature of which has previously been raised to 76° Fahrenheit. (The scale of the thermometer in the water-bath should range from 60° to 180° Fahrenheit).

¹ This paragraph was added by Notification No 928 (J) dated the 28th June, 1900, see Gazette of India, 1900, Pt. I, p 403.

(The First Schedule — Testing)

The test is then applied as described in section 4 of this part. If no flash has taken place when the temperature in the cup has reached 75°, the test need not be continued.

The temperature at which the flash occurs is the observed flashing point of the substance and subject to correction of atmospheric pressure as prescribed in the Act, is the true flashing point.]

IV—Directions for determining the flashing point of petroleum which is not fluid at ordinary temperatures

1 Nature of the test apparatus—The instrument employed is the Abel Pensky petroleum testing apparatus, fitted with an additional thermometer to indicate the temperature of the oil in close proximity to the walls of the cup. This thermometer has a cylindrical bulb, $\frac{1}{8}$ inch in length and $\frac{1}{16}$ inch in diameter. It is scaled from 45° to 165° Fahrenheit, ten degrees on the scale occupying $\frac{1}{8}$ inch. The thermometer is held vertically in a socket attached to the cover of the oil cup in such a position that the bulb is $\frac{1}{16}$ inch from the side of the cup.

(The thermometer can be removed and the orifice which is provided for it closed by means of an india-rubber plug, if the apparatus is required for testing petroleum in the ordinary way.)

2 Directions for preparing the sample for testing—About ten fluid ounces of the oil are placed in a pint flask, the mouth of which is then closed with an india rubber stopper and the sample is liquefied by placing the flask in a water bath, the temperature of which is only raised sufficiently high to liquefy the oil.

3 Directions for preparing and using the test-apparatus—The water-bath and test-lamp are to be prepared in the manner prescribed in Part III of this Schedule. The oil cup is to be filled with the liquefied oil, and the cover (into which both thermometers are to be previously inserted) placed on it, care being taken that the bulb of the additional thermometer is not brought into contact with the bracket-gauge fixed inside the cup. The oil-cup is then to be placed in a refrigerator, or plunged up to the projecting collar in water maintained at sufficiently low temperature, until both thermometers indicate the temperature at which the testing of petroleum is directed in Part III of this Schedule to be commenced. The oil cup is then to be removed, wiped dry and placed in the water-bath, and the testing effected in the manner prescribed in Part III of this Schedule, the temperature indicated by the additional (vertical) thermometer alone being noted, and the average of three determinations, duly corrected for atmospheric pressure, being recorded as the flashing point of the sample, provided that no greater difference than 4° Fahrenheit exists between any two of such results.

- (e) The grant of a license under this Part for any purpose shall not in any way hinder or restrict the grant of another license to another person within the same area of supply for a like purpose.
- (f) The provisions contained in the schedule shall be deemed to be incorporated with, and to form part of, every license granted under this Part, save in so far as they are expressly added to, varied or excepted by the license, and shall, subject to such additions, variations or exceptions (if any) which the Local Government, with the previous sanction of the Governor General in Council, is hereby empowered to make, apply to the undertaking authorized by the license, and shall be binding in like manner and to the same extent as if enacted in this Act.

(2) The Local Government may, if in its opinion the public interest so requires, revoke a license, as to the whole or any part of the area of supply, in any of the following cases, namely:—

- (a) where the licensee, in the opinion of the Local Government, makes wilful and unreasonably prolonged default in doing anything required of him by or under this Act,
- (b) where the licensee breaks any of the terms or conditions of his license the breach of which is expressly declared by such license to render it liable to revocation,
- (c) where the licensee, not being a local authority, fails, within a period of six months after the date of his license or such further period as the Local Government may determine and before exercising any of the powers conferred on him thereby in relation to the execution of works, to show, to the satisfaction of the Local Government, that he is in a position fully and efficiently to discharge the duties and obligations imposed on him by his license, or fails to make the deposit or furnish the security required by his license,
- (d) where the licensee is, in the opinion of the Local Government, unable by reason of his insolvency, fully and efficiently to discharge the duties and obligations imposed on him by his license;
- (e) where the licensee, not being a local authority, shows, to the satisfaction of the Local Government, at any time after the commencement

(Part II.—Supply of Energy to the Public. Sec 5.)

of his license, that his undertaking cannot be carried on with profit and ought to be abandoned,

- (f) where the licensee supplies energy by means of some system not approved by the Local Government,
- (g) in any other case, with the consent of the licensee and, if the licensee is not a local authority, with that of the local authority (if any) concerned, and upon such terms and conditions as it thinks just

Provided that the Local Government shall not revoke the license as to part only of the area of supply if the licensee represents that he desires to be relieved of his liabilities in respect of the whole

(3) Where the Local Government might, under sub-section (2), revoke a license, it may, instead of revoking the license, permit it to remain in force subject to such further terms and conditions as it thinks fit, and any further terms or conditions shall be binding upon, and be observed by, the licensee, and shall be of like force and effect as if they were contained in the license.

5. Where the Local Government revokes the license of any licensee, not being a local authority, as to the whole or any part of the area of supply, the following provisions shall have effect, namely :—

(a) The Local Government shall serve a notice of the revocation upon the licensee and upon any local authority concerned, and shall in the notice fix a date on which the revocation shall take effect, and on and with effect from that date all the powers and liabilities of the licensee under this Act shall absolutely cease and determine.

(b) Within one month after the service of such notice as aforesaid any local authority concerned may, if the Local Government has intimated to the local authority that it is at liberty so to do, by notice in writing, require the licensee to sell, and thereupon the licensee shall sell, to the local authority the undertaking or such part thereof as is carried on within the area for which it is constituted, on payment of the value of all lands, buildings, works, materials and plant of the licensee suitable to, and used by him for, the purpose of the undertaking or such part thereof as aforesaid, such value to be, in case of difference or dispute, determined by arbitration.

Provided that the value of such lands, buildings, works, materials and plant shall be deemed to be their fair market-value at the time of purchase, due regard being had to the nature and condition for the time being of such lands, buildings, works, materials and plant

and to the state of repair thereof, and to the circumstance that they are in such a position as to be ready for immediate working, and to the suitability of the same for the purposes of the undertaking, and, where a part only of the undertaking is purchased, to any loss occasioned by severance, but without any addition in respect of compulsory purchase or of goodwill or of any profits which may be or might have been made from the undertaking, or of any similar considerations

- (c) Where no purchase has been effected by a local authority under clause (b) and any other person is willing to purchase the undertaking or such part of it as aforesaid, the Local Government may, if it thinks fit, with the consent of the licensee, or without the consent of the licensee in case the price is not less than that for which the local authority might have purchased the same, require the licensee to sell, and thereupon the licensee shall sell, to such other person the undertaking or such part thereof as aforesaid
- (d) Where a purchase has been effected under clause (b) or clause (c), the undertaking, or such part thereof as aforesaid, shall vest in the purchasers free from any debts, mortgages, or similar obligations of the licensee, or attaching to the undertaking, and the revocation of the license shall extend only to the revocation of the rights, powers, authorities, duties and obligations of the licensee from whom the undertaking, or such part thereof as aforesaid, is purchased, and, save as aforesaid, the license shall remain in full force, and the purchaser shall be deemed to be the licensee.

- (f) Where no purchase has been effected under any of the foregoing clauses, the Local Government may forthwith cause the works of the licensee to be removed and the street to be reinstated and

(Part II.—Supply of Energy to the Public. Secs. 6-7.)

recover the cost of such removal and reinstatement from the licensee.

- (g) If the licensee has been required to sell the undertaking or any part thereof, and if the sale has not been completed by the date fixed in the notice issued under clause (a), the purchaser may, with the previous sanction of the Local Government, work the undertaking or such part thereof pending the completion of the sale.

undertaking

7. (1) Where a license has been granted, a local authority shall, on the expiration of such period, not exceeding forty-two years, and of every such subsequent period, not exceeding ten years, as shall be specified in this behalf in the license, have the option of purchasing such portion of the undertaking as is in the area for which it is constituted, and, if the local authority, with the previous sanction of the Local Government, elects to purchase, the licensee shall sell the undertaking or part thereof to it upon terms and conditions similar to those set forth in section 5, clauses (b) and (d).

(2) In any such case as aforesaid, if a local authority does not elect to purchase, the Local Government shall have the like option upon the like terms and conditions save that where the Local Government purchases the undertaking or any part thereof under such option the license shall, in so far as the Local Government is concerned, cease to have any further operation.

(4) Not less than twelve months' notice in writing of any election to purchase under this section shall be served upon the licensee by the local authority or the Local Government, as the case may be.

(5) Notwithstanding anything hereinbefore contained, the local authority may, with the previous sanction of the Local Government, waive its option of purchase and enter into an agreement with the licensee for the working by him of the undertaking, or such portion thereof as is in the area for which such authority is constituted, until the expiration of the next subsequent

(Part II—Supply of Energy to the Public. Secs. 8-11)

period referred to in sub-section (1), upon such terms and conditions as may be stated in such agreement

8. Where, on the expiration of any of the periods referred to in section 7, sub-section (1), neither the local authority nor the Local Government purchases the undertaking or any portion thereof, and the license is, with the consent of the licensee, revoked, the licensee shall have the option of disposing of all lands, buildings, works, materials and plant belonging to the undertaking in such manner as he may think fit

Provided that, if the licensee does not exercise such option within a period of six months, the Local Government may proceed to take action as provided in section 5, clause (f)

9. (1) The licensee shall not, at any time without the previous consent in writing of the Local Government, acquire, by purchase or otherwise, the undertaking of, or associate himself with, any person supplying, or intending to supply, energy under any other license, and, before applying for such consent, the licensee shall give not less than one month's notice of the application to every local authority, both in the licensee's area of supply, and also in the area or district in which such other person supplies, or intends to supply, energy.

(2) The licensee shall not at any time transfer his undertaking, or any part thereof, by sale, mortgage, lease, exchange or otherwise without the previous consent in writing of the Local Government.

Provided that any stay or strut required for the sole purpose of securing in position any support of an aerial electric supply-line may be fixed on any building or land or, having been so fixed, may be altered, notwithstanding the objection of the owner or occupier of such building or land, if the District Magistrate or, in a Presidency-town, the Commissioner of Police, by order in writing, so directs.

Provided also that if at any time the owner or occupier of any building or land on which any such stay or strut has been fixed shows sufficient cause, the District Magistrate or, in a Presidency-town, the Commissioner of Police may, by order in writing, direct any such stay or strut to be removed or altered.

(3) Every order made by a District Magistrate or a Commissioner of Police under sub-section (2) shall be subject to revision by the Local Government.

(4) Nothing contained in sub-section (1) shall be deemed to authorize or empower any licensee to open or break up any street not repairable by a local authority, or any railway or tramway, without the consent of the person by whom the same is repairable, unless with the written consent of the Local Government:

(*Part II—Supply of Energy to the Public. Sec. 13.*)

Provided that the Local Government shall not give any such consent as aforesaid, until notice has been given, by advertisement or otherwise as the Local Government may direct, to the person by whom the street, railway or tramway concerned is repayable, and until all representations or objections received in accordance with the notice have been considered by the Local Government

13. (1) Where the exercise of any of the powers of a licensee in relation to the execution of any works involves the placing of any works in, under, over, along or across any street, part of a street, railway, tramway, canal or waterway, the following provisions shall have effect, namely —

- (a) Not less than one month before commencing the execution of the works (not being a house-service or the repair, renewal or amendment of existing works of which the character or position is not to be altered), the licensee shall serve upon the person or authority responsible for the repair of the street or part of a street (hereinafter in this section referred to as "the repairing authority") or upon the person or authority for the time being entitled to work the railway, tramway, canal or waterway (hereinafter in this section referred to as "the owner"), as the case may be, a notice in writing describing the proposed works, together with a detailed plan thereof, on a scale which shall not be smaller than eighty-eight feet to the inch, or such other scale as the Local Government may approve, and intimating the manner in which, and time at which, it is proposed to interfere with or alter any existing works, and shall, upon being required to do so by the repairing authority or owner, as the case may be, from time to time give such further information in relation thereto as may be desired.
- (b) If the repairing authority intimates to the licensee that it disapproves of such works or plan, or approves thereof subject to amendment, the licensee may, within one week of receiving such intimation appeal to the Local Government, whose decision, after considering the reasons given by the repairing authority for its action, shall be final.
- (c) If the repairing authority fails to give notice in writing of its approval or disapproval to the licensee within one month, it shall be deemed to have approved of the works and plan, and the licensee, after giving not less than forty-eight hours' notice in

writing to the repairing authority, may proceed to carry out the works in accordance with the notice and plan served under clause (a).

(d) If the owner disapproves of such works or plan, or approves thereof subject to amendment, he may, within three weeks after the service of the notice under clause (a), serve a requisition upon the licensee demanding that any question in relation to the works, or to compensation, or to his obligations to others in respect thereof, shall be determined by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration.

(e) Where no requisition has been served by the owner upon the licensee under clause (d), the owner shall be deemed to have approved of the works and plan, and in that case, or where after a requisition, for arbitration the matter has been determined by arbitration, the works may, upon payment or securing of compensation, be executed according to the notice and plan, subject to such modifications as may have been determined by arbitration or agreed upon between the parties.

(f) Where the works to be executed consist of the repair, renewal or amendment of existing works of which the character or position is not to be altered, the licensee shall, except in cases of emergency, give to the repairing authority, or to the owner, as the case may be, not less than forty-eight hours' notice in writing of his intention to execute such works, and, on the expiry of such notice, such works shall be commenced forthwith and shall be carried on with all reasonable despatch and, if possible, both by day and by night until completed.

(2) Where the licensee makes default in complying with any of these provisions, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

(3) Notwithstanding anything in this section, the licensee may, in case of emergency due to the breakdown of an underground electric supply-line, after giving notice in writing to the repairing authority or the owner, as the case may be, of his intention to do so, place an aerial line without complying with the provisions of sub-section (1) :

Provided that such aerial line shall be used only until the defect in the under-ground electric supply-line can be made good, and in no case for a

(Part II.—Supply of Energy to the Public See 14)

period exceeding six weeks, and shall be removed as soon as may be after such defect is removed.

14 (1) Any licensee may alter the position of any pipe (not forming, in a case where the licensee is not a local authority, part of a local authority's main sewer), or of any wire under or over any place which he is authorized to open or break up, if such pipe or wire is likely to interfere with the exercise of his powers under this Act; and any person may alter the position of any electric supply-lines or works of a licensee under or over any such place as aforesaid, if such electric supply-lines or works are likely to interfere with the lawful exercise of any powers vested in him.

(2) In any such case as aforesaid the following provisions shall, in the absence of an agreement to the contrary between the parties concerned, apply, namely:—

- (a) Not less than one month before commencing any alteration, the licensee or other person desiring to make the same (hereinafter in this section referred to as "the operator") shall serve upon the person for the time being entitled to the pipe, wire, electric supply-lines or works, as the case may be (hereinafter in this section referred to as "the owner"), a notice in writing, together with a plan, on a scale which shall not be smaller than eighty-eight feet to the inch, or such other scale as the Local Government may approve, describing the proposed alteration and intimating the time when it is to be commenced, and shall subsequently give such further information in relation thereto as the owner may desire.
- (b) Within fourteen days after the service of the notice and plan upon the owner, the owner may serve upon the operator a requisition to the effect that any question arising upon the notice or plan shall be settled by arbitration, and thereupon the matter shall, unless settled by agreement, be determined by arbitration.
- (c) Every arbitrator to whom a reference is made under clause (b), shall have regard to any duties or obligations which the owner is under, and may require the operator to execute any temporary or other works so as to avoid as far as possible interference therewith.
- (d) Where no requisition is served upon the operator under clause (b), or where such a requisition has been served and the matter has been settled by agreement or determined by arbitration, the

- (e) The owner may, at any time before the operator is entitled to commence the alteration, serve upon the operator a statement in writing to the effect that he desires to execute the alteration himself and requires the operator to give such security for the repayment of any expenses as may be agreed upon or, in default of agreement, settled by arbitration.
 - (f) Where a statement is served upon the operator under clause (e), he shall, not less than forty-eight hours before the execution of the alteration is required to be commenced, furnish such security and serve upon the owner a notification in writing intimating the time when the alteration is required to be commenced, and the manner in which it is required to be made, and thereupon the owner may proceed to execute the alteration as required by the operator.
 - (g) Where the owner declines to comply, or does not, within the time and in the manner prescribed by a notification served upon him under clause (f), comply with the notification, the operator may himself execute the alteration.
 - (h) All expenses properly incurred by the owner in complying with a notification served upon him by the operator under clause (f) may be recovered by him from the operator.
 - (i) Where the operator makes default in complying with any of these provisions, he shall make full compensation for any loss of damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.
15. (1) Where a licensee requires to dig or sink any trench for laying down any new electric supply-lines (not being service-lines) or other works near to which any sewer, drain, watercourse or work under the control of the Local Government or of any local authority, or any main, pipe, siphon, electric supply line or other work belonging to any duly authorized person has been lawfully placed, or where any duly authorized person requires to dig or sink any trench for laying down or constructing any new mains or pipes (not being service-pipes) or other works, near to which any electric

supply-lines or works of a licensee have been lawfully placed, the licensee or such duly authorized person, as the case may be (hereinafter in this section referred to as "the operator") shall, unless it is otherwise agreed upon between the parties interested or in case of sudden emergency, give to the Local Government or local authority, or to such duly authorized person or to the licensee, as the case may be (hereinafter in this section referred to as "the owner"), not less than forty-eight hours' notice in writing before commencing to dig or sink the trench, and the owner shall have the right to be present during the execution of the work which shall be executed to the reasonable satisfaction of the owner.

(2) Where the operator finds it necessary to undermine, but not to alter, the position of any pipe, electric supply-line or work, he shall temporarily support it in position during the execution of the work, and before completion shall provide a suitable and proper foundation for it where so undermined.

(3) Where the operator (being the licensee) lays any electric supply-line across, or so as to be liable to touch, any mains, pipes, lines or service-pipes or lines belonging to any duly authorized person or to any person supplying or using energy under this Act, he shall not, except with the consent of such person and of the Local Government, lay his electric supply-lines so as to come into contact with any such mains, pipes, lines or service-pipes or lines, or, except with the like consent, employ any such mains, pipes, lines or service-pipes or lines as conductors for the purpose of supplying energy.

(4) Where the operator makes default in complying with any of the provisions of this section, he shall make full compensation for any loss or damage incurred by reason thereof.

(5) Where any difference or dispute arises under this section, the matter shall be determined by arbitration.

(6) Where the licensee is a local authority, the references in this section to the local authority and to sewers, drains, water-courses or works under its control shall not apply.

- (b) before sunset cause a light, sufficient for the warning of passengers, to be set up and maintained until sunrise against or near the part opened or broken up

Streets, railways, tramways, sewers, drains or tunnels broken up to be reinstated without delay.

(d) after reinstating and making good the soil or pavement, or the sewer, drain or tunnel, broken or opened up, keep the same in good repair for three months and for any further period, not exceeding nine months, during which subsidence continues.

(2) Where any person fails to comply with any of the provisions of sub-section (1), the person having the control or management of the street, railway, tramway, sewer, drain or tunnel in respect of which the default has occurred, may cause to be executed the work which the defaulter has delayed or omitted to execute, and may recover from him the expenses incurred in such execution.

(3) Where any difference or dispute arises as to the amount of the expenses incurred under sub-section (2), the matter shall be determined by arbitration.

Aerial lines

17. Nothing in this Part shall be deemed to authorize or empower a licensee to place any aerial line along or across any street unless and until the Local Government, after consulting the local authority, has communicated to him a general approval in writing of the methods of construction which he proposes to adopt:

Provided that the communication of such approval shall in no way relieve the licensee of his obligations with respect to any other consent required by or under this Act

(2) Where any aerial line has been placed or maintained by a licensee in breach of the provisions of sub-section (1), the Local Government may require the licensee forthwith to remove the same, or may cause the same to be removed and recover from the licensee the expenses incurred in such removal

(3) Where any tree, standing or lying near an aerial line, interrupts or interferes with, or is likely to interrupt or interfere with, the conveyance or transmission of energy, a Magistrate of the first class may, on the application of the licensee, cause the tree to be removed or otherwise dealt with as he thinks fit

(4) When disposing of an application under sub-section (3), the Magistrate shall, in the case of any tree in existence before the placing of the aerial line, award to the person interested in the tree such compensation as he thinks reasonable, and such person may recover the same from the licensee.

(Part II—Supply of Energy to the Public Secs. 18-21)

18 (1) A licensee shall, in exercise of any of the powers conferred by or under this Act, cause as little damage, detriment and inconvenience as may be, and shall make full compensation for any damage caused by him or by any one employed by him.

(2) Where any difference or dispute arises as to the amount or the application of such compensation, the matter shall be determined by arbitration.

19. (1) A licensee or any person duly authorized by a licensee may at any reasonable time, and on informing the occupier of his intention, enter any premises to which energy is or has been supplied by him, for the purpose of—

(a) inspecting and testing the electric supply-lines, meters, fittings, works and apparatus for the supply of energy belonging to the licensee;

(b) ascertaining the quantity of energy consumed or supplied, or

(c) removing where a supply of energy is no longer required, or where the licensee is authorized to take away and cut off such supply, any electric supply-lines, fittings, works or apparatus belonging to the licensee.

(2) A licensee or any person authorized as aforesaid may also, in pursuance of a special order in this behalf made by the District Magistrate or, in a Presidency-town, by the Commissioner of Police, and after giving not less than twenty-four hours' notice in writing to the consumer, enter any premises to which energy is or has been supplied, or is to be supplied, by him, for the purpose of examining and testing the electric wires, fittings, works and apparatus for the use of energy belonging to the consumer.

20. (1) A licensee shall not be entitled to prescribe any special form of appliance for utilizing energy supplied by him, or, save as provided by section 23, sub-section (2), or by section 30, sub-section (6), in any way to control or interfere with the use of such energy.

Provided that no person may adopt any form of appliance, or use the energy supplied to him, so as unduly or improperly to interfere with the supply by the licensee of energy to any other person.

(2) Where any difference or dispute arises under this section, the matter shall be determined by arbitration.

21. Where energy is supplied by a licensee, every person within the area of supply shall, except in so far as is otherwise provided by the terms and conditions of the license, be entitled, on application, to a supply on the same terms as those on which any other person in the same area is entitled in similar circumstances to a corresponding supply :

(Part II.—Supply of Energy to the Public. Secs. 22-24)

Provided that no person having a private generating plant shall be entitled to demand a connection with the mains of the licensee in order to use the energy of the licensee only in the event of accident to the plant of such person.

Maximum electrical power.

22. (1) The electrical power at which any consumer shall be entitled to be supplied by a licensee, shall not exceed what is necessary for the maximum consumption of energy on his premises.

Provided that, where a consumer has required a licensee to supply him at a specified maximum power, he shall not be entitled to alter that maximum except after one month's notice in writing to the licensee, and the licensee may recover from the consumer any expenses incurred by him by reason of the alteration in respect of the service-lines by which energy is supplied to the consumer's premises, or of any fittings or apparatus of the licensee upon those premises.

(2) Where any difference or dispute arises between a consumer and a licensee as to the power at which energy is to be supplied under sub-section (1) or as to the amount of the expenses incurred under the proviso thereto, the matter shall be determined by arbitration.

Charges for energy to be made without undue preference.

23. (1) A licensee shall not, in making any agreement for the supply of energy, show undue preference to any person, but may, save as aforesaid, make such charges for the supply of energy as may be agreed upon, not exceeding the limits imposed by his license, and may allow rebates thereon according to the quantity supplied, either in relation to the maximum power to which the consumer is entitled under section 22, or to the total quantity, or to the time at which the supply is needed.

(2) Notwithstanding anything in sub-section (1), the licensee may, with the consent of the Local Government, charge at one rate for the supply of energy for lighting purposes, and at other rates for the supply of energy for purposes other than lighting, and no person shall be entitled to utilize for one purpose energy supplied to him at a lower rate for any other purpose.

(3) Where any difference or dispute arises between a consumer and a licensee as to any matter provided for in sub-section (1) or sub-section (2), the matter shall be determined by arbitration.

Discontinuance of supply to consumer neglecting to pay charge.

24. Where any person neglects to pay any charge for energy or any other sum due from him to a licensee in respect of the supply of energy to him, the licensee may, after giving not less than seven clear days' notice in writing to such person and without prejudice to his right to recover such charge or other sum by suit, cut off the supply and for that purpose cut or

Provided that the provisions of this section shall not apply in any case in which any difference or dispute of the nature described in section 30, subsection (7), has been referred for determination by an Electric Inspector or other person as therein provided until such Inspector or other person has given his decision.

25. Where any electric supply-lines, meters, fittings, works or apparatus belonging to a licensee are placed in or upon any premises, not being in the possession of the licensee, for the purpose of supplying energy, such electric supply-lines, meters, fittings, works and apparatus shall not be liable to be taken in execution under any process of any Civil Court or in any proceedings in insolvency against the person in whose possession the same may be.

26. No licensee shall, in exercise of any of the powers conferred by or under this Act, in any way injure any railway, tramway or canal or (in cases where the licensee is not a local authority) any dock, wharf or pier vested in or controlled by a local authority or obstruct or interfere with the traffic on any railway, tramway or canal

27. (I) Nothing in this Act shall be deemed to authorize or empower any licensee to lay down any underground, or place any aerial, electric supply-line or other works, or to make any alterations in any telegraph line, maintained or worked by the Government or by any person licensed under the

Indian Telegraph Act, 1885,¹ without the previous sanction of the telegraph-authority, to whom the licensee shall give not less than one month's notice in writing of his intention, specifying the course of the works or alterations proposed, the manner in which the works are to be utilized, the amount and nature of the energy to be transmitted, and the extent to, and manner in, which (if at all) earth returns are to be used, and the licensee shall conform with such reasonable requirements, either general or special, as may be laid down by the telegraph-authority for preventing any telegraph line from being injuriously affected by such works or alterations :

required to give only such notice as may be possible after the necessity for the proposed new works or alterations has arisen.

(2) Every licensee shall take all reasonable precautions in constructing, laying down and placing his electric-supply lines and other works and in working his undertaking, so as not injuriously to affect, whether by induction or otherwise, the working of any wire or line used for the purpose of telegraphic, telephonic or electric-signalling communication, or the currents in such wire or line.

(3) Where any difference or dispute arises between the licensee and the telegraph-authority or any person licensed under the Indian Telegraph Act, XIII of 1885¹, as to whether the licensee has constructed, laid down or placed his electric supply-lines or other works, or made alterations in a telegraph line, or worked his undertaking, in contravention of sub-section (1) or sub-section (2), or as to whether the working of any wire, line or current is or is not injuriously affected thereby, the matter shall be referred to the Governor General in Council; and the Governor General in Council, unless he is of opinion that the wire or line has been placed in unreasonable proximity to the electric supply-lines or works of the licensee after the construction of such lines or works, may direct the licensee to make such alterations in, or additions to, his system as may be necessary in order to comply with the provisions of this section, and the licensee shall make such alterations or additions accordingly:

Provided that nothing in this sub-section shall apply to the repair, renewal or amendment of any electric supply-line, so long as the course of the electric supply-line and the amount and nature of the current transmitted thereby are not altered.

(4) Where a licensee makes default in complying with the requirement of this section, he shall make full compensation for any loss or damage incurred by reason thereof, and, where any difference or dispute arises as to the amount of such compensation, the matter shall be determined by arbitration.

Explanation.—For the purposes of this section, a telegraph-line shall be deemed to be injuriously affected by a work if telegraphic communication by means of such line is, whether through induction or otherwise, prejudicially interfered with by such work or by any use made thereof.

28 (1) Every licensee shall, within twenty-four hours of the occurrence, send to the Local Government and to the District Magistrate or, in a Presidency-town, to the Commissioner of Police, notice in writing of any

accident by explosion, fire, electric shock or fall of an aerial line and also of any other accident resulting or likely to have resulted in loss of life or personal injury in any part of the licensee's works or circuits, or in connection with the same, and also notice of any loss of life or personal injury actually occasioned by any such accident

(2) The Local Government may also, if it thinks fit, appoint any Electric Inspector or other competent person to inquire and report as to the cause of any accident affecting the safety of the public, which may have been occasioned by or in connection with a licensee's works, or as to the manner in, and extent to, which the provisions of the license and of this Act, so far as those provisions affect the safety of the public, have been complied with by the licensee

29. If at any time it is established, to the satisfaction of the Local Government,—

- (a) that a licensee is supplying energy otherwise than by means of a system which has been approved of by the Local Government or (except in accordance with the provisions of his license) has permitted any part of his circuits to be connected with earth, or
- (b) that any electric supply-lines or works of a licensee are defective, or
- (c) that any works of a licensee or his supply of energy are or is attended with danger to the public safety,

the Local Government may, by order in writing, specify the matter complained of and require the licensee to remedy it in such manner as shall be specified in the order, and may also in like manner forbid the use of any electric supply-line or works until the order is complied with or for such time as is specified in the order.

30. (1) In the absence of an agreement to the contrary, the amount of Meters energy supplied to a consumer of the electrical quantity contained in the supply (such amount or quantity being hereinafter referred to as "the value of the supply") shall be ascertained by means of a duly certified meter, and the licensee shall, if required by the consumer, cause the consumer to be supplied with such a meter.

Provided that the licensee may require the consumer to give him security for the price of a meter and enter into an agreement for the hire thereof unless the consumer elects to purchase a meter.

(2) Where the consumer so enters into an agreement for the hire of a meter, the licensee shall keep the meter in proper order for correctly registering the value of the supply, and, in default of his doing so, the consumer

(Part II.—Supply of Energy to the Public. Sec. 30)

shall, for so long as the default continues, cease to be liable to pay for the hire of the meter:

(3) Where the meter is the property of the consumer, he shall keep the meter in proper order for correctly registering the value of the supply, and, in default of his doing so, the licensee may, for so long as the default continues, cease to supply energy through the meter.

(4) The licensee or any person duly authorized by the licensee shall, at any reasonable time and on informing the consumer of his intention, have access to and be at liberty to take off, remove, test, inspect and replace any meter whereby the value of the supply is ascertained or to be ascertained, and, except where the meter is so hired as aforesaid, all reasonable expenses of, and incidental to, such taking off, removing, testing, inspecting and replacing, and the procuring the meter to be again duly certified, where that is thereby rendered necessary, shall, if the meter is found to be otherwise than in proper order, be recovered from the consumer, and where any difference or dispute arises as to the amount of such reasonable expenses, the matter shall be determined by arbitration.

Provided that the licensee shall not be at liberty to take off or remove any such meter if any difference or dispute of the nature described in sub-section (7) has arisen until the matter has been determined as therein provided.

(5) A consumer shall not connect any meter, whereby the value of the supply is ascertained or to be ascertained, with any electric supply-line through which energy is supplied by a licensee, or disconnect the same from any such electric supply-line, without giving to the licensee not less than forty-eight hours' notice in writing of his intention.

(6) In addition to any meter which may be placed upon the premises of a consumer to ascertain the value of the supply, the licensee may place upon such premises such meter or other apparatus as he may think fit for the purpose of ascertaining or regulating either the amount of energy supplied to the consumer, or the number of hours during which the supply is given, or the maximum power taken by the consumer, or any other quantity or time connected with the supply :

Provided that the meter or apparatus shall be of a construction and pattern approved of by the Local Government, and shall be fixed and connected with the service-lines in a manner so approved, and shall be supplied and maintained entirely at the cost of the licensee, and shall not, in the absence of an agreement to the contrary, be placed otherwise than between the mains of the licensee and the consumer's terminals.

(*Part III.—Restrictions on Use of Energy not supplied under Part II Sec. 31*)

(7) Where any difference or dispute arises as to whether any meter, whereby the value of the supply as to pressure or quantity is ascertained or to be ascertained, is or is not in proper order for correctly registering the value of the supply, or as to whether such value has in any case been correctly registered by the meter, the matter shall be determined, upon the application of either party, by an Electric Inspector or by a competent person specially appointed by the Local Government in this behalf, and, where the meter has, in the opinion of such Inspector or person, ceased to work for a period not exceeding one month, such Inspector or person shall estimate the value of the supply for such period on the basis of the value of the previous supply, and the decision of such Inspector or person shall be final, and the costs of or incidental to such determination shall be recoverable as such Inspector or person may direct but, save as aforesaid, the register of the meter, whereby the value of the supply is ascertained, shall, in the absence of fraud, be conclusive proof of such value.

Explanation—A meter shall be deemed to be “duly certified” if it is certified by an Electric Inspector or by a competent person appointed by the Local Government in this behalf to be a correct meter, and to be of a construction and pattern approved by the Local Government, and to have been fixed and connected with the electric supply-lines in a manner so approved.

Provided that, where any alteration is made in a duly certified meter, or where any such meter is unfixed or disconnected from the electric supply-lines, it shall cease to be a duly certified meter unless and until it is again duly certified as aforesaid.

IX (1) Where a requisition is made by the owners or occupiers of any premises situate within one hundred yards from any distributing main in which the licensee is required to maintain a supply of energy for the purposes of general supply, requiring the licensee to supply energy for such premises, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy in accordance with the requisition, unless the person making it fails, within fourteen days after the service on him by the licensee of a notice in writing in this behalf, to tender to the licensee a written contract, duly executed and with sufficient security, binding himself to take a supply of energy for not less than two years to such amount as will produce, at current rates charged by the licensee, a reasonable return to the licensee.

Provided, first, that the cost of so much of any electric supply-line as may be laid for the purposes of the supply upon the property in respect of which the requisition is made, and of so much of any electric supply-line as it may be necessary for the said purposes to lay for a greater distance than one hundred feet from the licensee's distributing main, although not on that property, shall, if the licensee so requires, be paid by the owner or occupier making the requisition:

Provided, secondly, that the licensee may, after he has furnished a supply of energy for any premises, by notice in writing require the owner or occupier, within seven days after the date of the service of the notice, to give him security for the payment of all money which may become due to him in respect of the supply, in case the owner or occupier has not already given that security, or in case any security given has become invalid or is insufficient, and, if the owner or occupier fails to comply with the terms of the notice, the licensee may discontinue to supply energy for such premises so long as such failure continues:

Provided, thirdly, that if the owner or occupier of any such premises as aforesaid adopts any form of lamp or burner, or uses the energy supplied to him by the licensee for any purposes, or deals with it in any manner, so as to interfere unduly or improperly with the efficient supply of energy to any other person by the licensee, or fails to keep his meter in proper order, the licensee may discontinue the supply of energy for such premises so long as such lamp or burner is so adopted, or the energy is so used or dealt with, or the meter is not kept in proper order, as the case may be:

(*The Schedule — Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II*)

Provided, fourthly, that the licensee shall not be bound to furnish a supply of energy to any premises if an Electric Inspector or other competent person appointed by the Local Government is satisfied that the electric line, fittings, works and apparatus therein are not in good order and condition and are likely to affect injuriously the use of energy by the licensee or by other persons

Provided, fifthly, that in the event of any alterations of, or additions to, any electric wires, fittings, works or apparatus within such premises as aforesaid, all such alterations or additions shall be notified to the licensee by the owner or occupier before being connected to the source of supply, with a view to their being examined and tested and

Provided, sixthly, that, in the event of any requisition being made for a supply of energy from any distributing main of which the licensee can prove to the satisfaction of an officer appointed by the Local Government in this behalf,—

- (a) that it is already loaded up to its full-current-carrying capacity, or
- (b) that, in case of a larger amount of current being transmitted by it, the loss of pressure will seriously affect the efficiency of the supply to other consumers in the vicinity,

the licensee may refuse to accede to the requisition for such reasonable period, not exceeding six months, as such officer may think sufficient for the purpose of amending the distributing main or laying down a further distributing main.

(2) Where any difference or dispute arises as to the sufficiency of the security offered by such owner or occupier, or as to the improper use of energy, or as to any alleged defect in any wires, fittings, works or apparatus, or as to any alleged excess or defect in the pressure or quantity of the energy supplied, the matter shall be referred to the Local Government and either decided by it or, if the Local Government so directs, determined by arbitration.

(3) Every requisition under this clause shall be signed by the maker or makers thereof and shall be served on the licensee.

(4) Every requisition under this clause shall be in a form to be prescribed by rules under the Indian Electricity Act, 1903, and copies of the form shall be kept at the office of the licensee and supplied free of charge to any applicant.

X. (1) Where a requisition is made by the Local Government or by a local authority requiring the licensee to supply for a period of not less than ^{Supply for} _{public lamps}

(*The Schedule.—Provisions to be deemed to be incorporated with, and to form part of, every license granted under Part II*)

one year energy for any public lamps within the distance of one hundred yards from any distributing main in which the licensee is required to maintain a supply of energy for the purposes of general supply, the licensee shall supply, and, save in so far as he is prevented from doing so by cyclones, floods, storms or other occurrences beyond his control, continue to supply, energy for such lamps in such quantities as the Local Government or the local authority, as the case may be, may require

(2) The provisions contained in the first, fourth, fifth and sixth proviso to sub-clause (1) and in sub-clause (2) of clause IX shall, so far as may be, apply to every case in which a requisition for the supply of energy is made under this clause as if the Local Government or local authority were an owner or occupier within the meaning of those provisions

- (a) by the actual amount of energy so supplied; or
- (b) by the electrical quantity contained in the supply; or
- (c) by such other method as may be approved by the Local Government:

Provided, first, that, where the licensee charges by any method so approved by the Local Government, any consumer who objects to that method may, by not less than one month's notice in writing, require the licensee to charge him, at the licensee's option, either by the actual amount of energy supplied to him or by the electrical quantity contained in the supply, and thereafter the licensee shall not, except with the consent of the consumer, charge him by another method:

Provided, secondly, that, before commencing to supply energy through any distributing main for the purposes of general supply, the licensee shall give notice, by public advertisement, of the method by which he proposes to charge for energy so supplied; and, where the licensee has given such notice, he shall not be entitled to change that method of charging without giving not less than one month's notice in writing of such change to the Local Government, to the local authority (if any) concerned, and to every consumer of energy who is supplied by him from such distributing main:

Provided, thirdly, that, if the consumer is provided with a duly certified meter for the purposes of ascertaining the value of the supply and the licensee changes the method of charging for the energy supplied by him from the

Provided that, if, at any time after the expiration of seven years from the commencement of the license, the Local Government considers or is satisfied that the maximum so fixed or approved as aforesaid should be altered, it may, after such inquiry (if any) as it thinks fit, make an order accordingly, which shall have effect from such date as may be mentioned therein.

Provided, also, that where an order in pursuance of the foregoing proviso has been made, no further order altering the maximum fixed thereby shall be made until the expiration of another period of seven years.

XIII. The price to be charged by the licensee and to be paid to him for energy supplied for the public lamps, and the mode in which those charges are to be ascertained, shall be settled by agreement between the licensee and the Local Government or the local authority, as the case may be, and, where any difference or dispute arises, the matter shall be determined by arbitration. XVII On the occasion of the testing of any main of the licensee by an Electric Inspector, reasonable notice thereof shall be given to the licensee and the testing shall be carried out at such suitable hours as, in the opinion of the Electric Inspector, will least interfere with the supply of energy by the licensee, and in such manner as the Electric Inspector may think fit, but, except under the provisions of an order made in each case in that behalf by the Local Government, the Electric Inspector shall not be entitled to have access to, or interfere with, the mains of the licensee at any points other than those at which the licensee has reserved for himself access to the same

Provided that the licensee shall not be held responsible for any interruption in the supply of energy which may be occasioned by or required by the Electric Inspector for the purpose of any such testing as aforesaid

Provided, also, that the testing shall not be made in regard to any particular portion of a main oftener than once in any three months, unless in pursuance of an order made in each case in that behalf by the Local Government.

PART III.

REFERENCE TO COURT AND PROCEDURE THEREON.

Reference to
Court.

18. (1) Any person interested who has not accepted the award may, by written application to the Collector, require that the matter be referred by the Collector to the determination of the Court, whether his objection be to the measurement of the land, the amount of the compensation, the persons to whom it is payable, or the apportionment of the compensation among the persons interested :

Provided that every such application shall be made,—

- (a) if the person making it was present or represented before the Collector at the time when he made his award, within six weeks from the date of the Collector's award,

(2) The application shall state the grounds on which objection to the award is taken.

(Part III.—Reference to Court and Procedure thereon. Secs. 19-23.)

19. (1) In making the reference the Collector shall state for the information of the Court, in writing under his hand,—

Collector's statement to the Court.

- (a) the situation and extent of the land with particulars of any damage caused under section 6 or of restrictions imposed under section 7;
- (b) the names of the persons whom he has reason to think interested in such land,
- (c) the amount of compensation awarded under section 12; and,
- (d) if the objection be to the amount of the compensation, the grounds on which the amount of compensation was determined.

(2) To the said statement shall be attached a schedule giving the particulars of the notices served upon, and of the statements in writing made or delivered by, the parties interested respectively.

20. The Court shall thereupon cause a notice specifying the day on which the Court will proceed to determine the objection, and directing their appearance before the Court on that day, to be served on the following persons, namely:—

- (a) the applicant,
- (b) all persons interested in the objection, except such (if any) of them as have consented without protest to receive payment of the compensation awarded; and,
- (c) if the objection is in regard to the area of the land, the nature of the obstructions or the amount of the compensation, the Collector.

21. The scope of the inquiry in every such proceeding shall be restricted to a consideration of the interests of the persons affected by the objection.

Restriction on scope of proceedings.

22. Every such proceeding shall take place in open Court and all persons entitled to practise in any Civil Court in the Province shall be entitled to appear, plead and act, as the case may be, in such proceeding.

Proceedings to be in open Court.

23. (1) In determining the amount of compensation to be awarded for damage caused, or to be caused, or for restrictions imposed under this Act, the Court shall take into consideration—

Matters to be considered in determining compensation.

- (a) the actual decrease in market-value of the land owing to the publication of the declaration relating thereto under section 3 and any damage caused or to be caused under section 6,
- (b) the damage sustained by the person interested, by reason of the removal of any standing crops in the exercise of any power conferred by section 6;
- (c) the damage (if any) sustained by the person interested, by reason of ceasing to be able to use such land conjointly with his other land,

(Part III.—Reference to Court and Procedure thereon. Secs 24-25.)

- (d) the damage (if any) sustained by the person interested by anything done or ordered under sections 6 and 7 injuriously affecting his other property, moveable or immoveable, in any other manner, or his earnings, and,
- (e) if, in consequence of the imposition of restrictions, the person interested is compelled to change his residence or place of business, the reasonable expenses (if any) incidental to such change.

(2) In addition to the amount representing the actual decrease in the market-value of the land as above provided, the Court shall in every case award a further sum of fifteen per centum on such amount

24. In determining the amount of compensation to be awarded for damage caused, or to be caused, or for restrictions imposed under this Act, the Court shall not take into consideration—

- (a) the degree of urgency which has led to the damage or the imposition of restrictions,
- (b) any disinclination of the person interested to submit to damage or restrictions,

(2) When the award of the Collector is not upheld, the costs shall ordinarily be paid by the Collector, unless the Court is of opinion that the claim of the applicant was so extravagant or that he was so negligent in putting his case before the Collector that some deduction from his costs should be made or that he should pay a part of the Collector's costs

28. If the sum which, in the opinion of the Court, the Collector ought to have awarded as compensation is in excess of the sum which the Collector did award as compensation, the Court may direct that the Collector shall pay interest on such excess at the rate of six per centum per annum from the date of his award to the date of payment of such excess into Court.
